title	Class/sub class
Container and closure construction	220/265
Loading device for directing a tape-like element from a supply reel to a take up reel and about a guide drum therebetween	242/332.3
Cassette tape recording and/or reproducing apparatus	360/137
Magnetic recording device	360/21
Apparatus and method for reproducing video signals	360/21
Helical scan type video tape recorder	360/271
Helical scan magnetic tape recording apparatus for reforming read-after-write storage of manufacturing rotary head used therein	360/271.5
Four read and write heads on a drum arranged to prevent overlapping of	360/271.5
Positionable transducing mounting structure and driving system therefor	360/292
Method and apparatus for reproducing or recording a PCM signal and sub data concerning the PCM signal in a paired format	360/32
Digital data recording and reproducing method	360/40
Method and apparatus for identifying recorded information segments on a	360/40
Tape marks recorded in user data blocks having identifications of the	360/48
Apparatus and method for formatting and recording digital data on	360/48
Method and apparatus for recording a digital information signal and tracking pilot signals at different locations in the track	360/48
Single revolution disk sector formatter	360/48
Tape motion control for reel-to-reel drive	360/50
Monitor apparatus for rotary head	360/53
Method of reading digital data on magnetic tape	360/53
Dual channel helical recorder	360/54
Decoding apparatus	360/60
Rotary head magnetic recorder for use with a specific record member	360/62
Information signal reproducing apparatus with track pitch discriminating	360/64
Waveguide apparatus for coupling a high data rate signal to and from a	360/64
Magnetic tape recording/reproducing apparatus	360/7
Method and apparatus for tape speed override operation when recovering	360/70
Method and apparatus for controlling the stepping feed of an information	360/70
Automatic head tracking system	360/70
Method for recording/reproducing and searching digital signals using a	360/72.2
Apparatus and method for enabling rapid searching of helically recorded	360/72.2
Rotary head type digital signal playback	360/72.2
TEXT AVAILABLE IN USOCR DATABASE	360/72.2
MULTIMODE SEARCH AND RETRIEVAL TAPE SYSTEM	360/72.2
Helical scan method and apparatus for adjusting media speed to read non-	360/73.04
Multi-speed tape cassette system	360/73.07
Write splicing for helical scan recorder	360/74.1
Apparatus and method for distorted track data recovery by rewinding and re-reading the tape at a slower than nominal speed	360/74.4
Tape positioning using reverse boundary capture: tape drive system and	360/74.4
Tape format detection system	360/74.5
Position control apparatus for controlling positions of rotary heads with	360/75
Signal reproducing device which offsets the tracking error signal	360/77.01
Method and apparatus for reading distorted helical stripes	360/77.13
System for correlating head scan tracking and tape timer transitions	360/77.13
Servo tracking for helical scan recorder	360/77.13
Tracking control devices for video tape recorders	360/77.13
track by sampling and holding a tracking control signal used for tracking at a first part of the given track	360/77.14
Method and apparatus for recording and reproducing a digital signal on a	360/77.14
Method and apparatus for recording a digital information signal	360/77.14
Cyclical servo zone tracking method and apparatus for helical scan	360/77.15
Method and apparatus for reproducing signals having improved rotary head	360/77.15
Apparatus and method for reading helically recorded tracks and rereading	360/77.16
Dynamic head position tracking control for a magnetic tape playback	360/77.16
Automatic head position tracking system for video signals recorded in a	360/77.16
Recording apparatus for video signal	360/77.16
Head tracking control system for a helical scan VTR	360/77.16
Drive circuitry for controlling movable video head	360/77.16
Automatic scan tracking servo system	360/77.17
Apparatus and method for controlling the position of a rotary head	360/77.17
Head tracking control system	360/77.17
Method and apparatus for recording and reproducing an information signal	360/8
Capstanless helical drive system	360/84
Tape loading device for a cassette type tape recording and/or reproducing	360/85
Tape loading apparatus for use in a recording and/or reproducing	360/85
Tape loading apparatus	360/85
Magnetic tape loading apparatus	360/85
Magnetic rotary head recorder with automatic tape loading and unloading	360/85
Magnetic tape apparatus comprising a control unit for controlling tape buffers, the tape tension and the tape-transport	360/85
Method and apparatus for loading data cartridge about two pivot axes into	360/98.5
Lid locking mechanism for an automatic tape cassette loading and	360/98.5
VCR cassette transport mechanism with mechanical overload protection	360/98.5
Tape cassette loading and ejecting device in a magnetic recording and/or	360/98.5
Magnetic recording and reproducing apparatus	360/98.5
Tape cassette loading device in a magnetic recording and/or reproducing	360/98.5
Tape magazine and recording and/or playback machine with improved	360/98.5
Device for loading or unloading magnetic disc pack	360/98.08
Cartridge receiver mechanism	360/98.08
Packet switching system arranged for congestion control	370/236
Information recording apparatus	388/104
Method and apparatus of inserting an address signal in a video signal	388/112
Multiplex magnetic recording and reproduction system	388/23
Video signal recording apparatus	388/38
Helical scan recording/reproducing device for simultaneously helically recording/reproducing both video and audio signals	388/39
Storage and retrieval of digital data on video tape recorders	388/47
Tape synchronizing apparatus	388/58
Magnetic recording editing apparatus with erase head	388/63
Apparatus for recording and/or reproducing an additional information signal	388/67
Tape speed determining apparatus for video signal reproducing apparatus	388/67
recording modes and for reproducing the magnetically recorded video signal	388/68
Method and apparatus for the variable speed reproduction of a video signal	388/71
Magnetic tape recording and reproducing arrangements	388/72
System for reproducing video signals in slow-motion mode	388/78
Method and apparatus for reproducing a compressed digital video signal at	388/79
Helical scan tracking apparatus including means for correcting for track	388/79
Helical scan magnetic recording and reproduction system with head position	388/79
Multi-channel recording apparatus using a plurality of heads in turn	388/84
System for dynamically determining motion and reconnect thresholds of a storage media based on the effective transfer rate	710/52
Plural incompatible instruction format decode method and apparatus	712/209
Digital data error correction method and apparatus	714/54
Apparatus for reproducing a digital signal	714/764
